Sepak Industries Sous-Vide Systems

Sous vide cooking method has been adopted by the finest chefs around the world to produce consistently, safe and tasty food at an accurately determined temperature. Sous vide or low temperature cooking method has become popular to commercial chefs for retaining more flavour, nutrients and texture than traditional cooking. SEPAK INDUSTRIES Sous-vide system is designed for cooking food in hygienically sealed airtight food grade plastic pouches (usually Vacuum Packed!) in a water bath at relatively low temperature for fairly long time. In this system the temperature and time can be controlled more precisely than the conventional cooking method. SEPAK Industries has been serving the Food & Beverage industries since 1989, through years of experience and investment Research & Development we have developed Sous-vide System to suit application of slow cooking method to perfection.
